EDUCATION

Fr Conceicao Rodrigues Institute of Technology, Vashi

Bachelors of Technology in Computer Science, CGPA - 8.67

Mumbai, India

Aug 2023 – Present

EXPERIENCE

Research Project Intern

Jun 2025 – Present

IISER Mohali (in collaboration with Suraj Informatics)

Mumbai, India

- Developed a **CI/CD DevSecOps** pipeline integrating **Jenkins, SonarQube, Nginx, and Nexus**, achieving automated build, test, and deployment workflows that **reduced deployment time by 80 %**.
- Implementing **source code quality checks, artifact management, and security scanning** to enhance software reliability.
- Collaborating with teams from IISER Mohali and Suraj Informatics to design a scalable DevSecOps infrastructure for research and enterprise applications.

PROJECTS

Resume Scorer | Python, SpaCy, Machine Learning

- Utilized **Python** and **SpaCy** to extract keywords and analyze context from resumes, assessing technical skills effectively.
- Developed a **scoring algorithm** evaluating project complexity, experience diversity, and skill tiers for fair candidate comparison.
- Normalized scores using **MinMaxScaler** for unbiased comparisons across large resume datasets.

Altereats -Healthy Alternative to Junk food

(Aug 2024- May 2025)

- Developed a web-based meal planner recommending recipes tailored to user preferences and dietary requirements.
- Built a responsive UI with **HTML, CSS, and JavaScript**, integrating a Flask backend through robust API connections.
- Enhanced user experience by implementing dynamic data visualizations and designing an intuitive interface.

SheSecure –

(Aug 2025- Present)

- Developed an **Android safety application** featuring real-time location tracking and instant SOS alerts
- Integrated **Firebase for secure user authentication** and **Google Maps API** for live navigation
- Designed with a focus on women's safety, incorporating proactive alert capabilities and emergency contact triggers

AI Systems / Chatbots

- Built intelligent agents using **LangChain, OpenAI APIs, and n8n** for automated tasks like study planning and content generation.
- Designed modular workflows **integrating API calls**, context management, and conversation logic.
- Developed an **Email Generator** that automates email creation processes.
- Built an **Offline Study Companion** enabling users to study without internet access.
- Engineered a **Data Analyzer Bot** for dataset analysis and actionable insights.
- Designed a **Meme Generator Bot** for automatic meme creation.
- Deployed a **News Telegram Chatbot** to deliver news updates via Telegram.
- Launched an **AI Breakup Recovery Agent** offering emotional support after breakups.

CO-CURRICULAR

Entrepreneurial Cell (E-Cell), Technical Team Member

2024 – 2025

- Contributed to the development and maintenance of event websites and technical setups for E-Cell initiatives. Supported flagship events like **Sparkathon, Innovex, and E-Summit**, ensuring smooth technical execution.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

Frameworks & Web: React, Flask, FastAPI, HTML, CSS,

DevOps & CI/CD: Jenkins, SonarQube, Nexus, Local Git, CI/CD pipeline development (LEARNING)

AI / Machine Learning & Libraries: OpenAI API, LangChain, Pandas, NumPy, Matplotlib, OpenCV, Scikit-learn, n8n, LLM, Gen AI

Certifications: [Oracle Cloud Infrastructure 2025 Certified Generative AI Professional](#)
